

THE FIRST PRESBYTERIAN CHURCH OF KENT

A welcoming community empowered by God to serve others in Christ's love

Rev. Carol Kirkpatrick

April 10, 2008

To whom it may concern:

As the pastor of First Presbyterian Church in Kent I would personally like to thank Sonitrol Pacific for the outstanding service that they provide us. We have had a Sonitrol security system in our church since 1999 and are looking forward to our continued relationship.

As a church that has been in this community since 1891 we have deep roots in the Kent area. It is unfortunate to believe that even a church that is constantly serving others can be a target by the less fortunate. In 2005 Sonitrol Pacific detected sounds of glass breaking and dispatched the police. Because of Sonitrol's unique audio based intrusion system the perpetrator was apprehended by the police. He was inside our building trying to pry open the case that holds our sound equipment when police arrived on scene.

As a church that uses its' sanctuary for weddings, fellowship, youth activities and many other numerous things, loosing our sound equipment would be very unfortunate. Having a security company that understands that church's too have precious things to protect is priceless. Sonitrol Pacific has enough faith in their system that they have offered us a \$5,000 performance warranty. Meaning that if they fail to dispatch or miss a break in, they will share in our loss above and beyond our insurance.

Our church places a very high value on the safety and security of our congregation and place of worship. For this reason we have partnered ourselves with Sonitrol Pacific. They understand the unique needs of our church and there is no comparison to the overall value of having Sonitrol as a security partner.
