American Pawnbrokers has been in business since 1956. In 2002 we took a large leap and decided to move the business to another location. My father was a police officer and let me know that I should go with Sonitrol for my security needs. He liked responding to calls that were monitored by Sonitrol because they weren't just another false alarm. I decided to go a less expensive route with another alarm company that supposedly had the same technology, I was wrong. In 2005 I acquired Able Loans and they had an existing alarm system that was installed and monitored by Sonitrol for close to 20 years. Wow, what a difference. They made it easy to make the transition. One of the things that stands out most is they added users and codes from their office and I didn't need to go and find my owners manual and waste time doing it myself. I am still impressed years later, great service, if there is an issue that arises; there is a willingness to get me taken care of quickly. I am designing a larger building to move our Pawn Store into and you can bet we will be using Sonitrol. I will not waste my time, I want the best.
